HEALTH CARE TAX HAS CHANGED

Changes in National Health Insurance Tax Limit

Treatment	¥520,000	→	¥540,000 (+¥20,000)
After-treatment Support	¥170,000	→	¥190,000 (+¥20,000)
Nursing & Care	¥160,000	→	¥160,000 (No Change)

Changes in Criteria for Households with Reductions

Category	Reduction Amount (Per Capita and Equal Reductions)	House Hold Total Income (Income of head of house and all enrolled in health care)	
		Before the Change	After the Change
①	70% Reduction	Households under ¥330,000	→ Households under ¥330,000 (No Change)
②	50% Reduction	Household income does not match ①, but it is less than (¥330,000 + No. of insured persons × ¥260,000)	→ Household income does not match ①, but it is less than (¥330,000 + No. of insured persons × ¥265,000)
③	20% Reduction	Household income does not match ① or ②, but it is less than (¥330,000 + No. of insured persons × ¥470,000)	→ Household income does not match ① or ②, but it is less than (¥330,000 + No. of insured persons × ¥480,000)

In accordance with the legislation changes that happen every fiscal year, the criteria for target households for tax reductions has expanded this fiscal year. In addition National Health Care Taxes have also increased.

Furthermore, for those who are not required to report Income or Residence Tax must still report that they do not have an income in order to complete the process of deciding how much their health care tax reduction and the category for the amount they have to pay. If you have no income, or you are living off of survivor's insurance or tax exempt income, please report that as well.
